Matt Campbell

I am a highly dedicated and extremely hard-working web developer
with 3 years commercial development experience working with the
Laravel framework. I graduated with a 2:1 in BSc (Hons)
Computing at Plymouth University in September 2013.

Profile

- Strong communication skills, both written and verbally.
- Experience liaising with clients, trying to come up with the best solutions for the client.
- Well-developed I.T skills combined with a flexible approach to work.
- Have initiative and capable of improvising where necessary.
- Good people skills and can develop great working relationships.
- I believe I possess a positive attitude and have a passion for expanding my knowledge.

Education

2011-2013   **BSc, Computing**; University of Plymouth (2:1)

- *Final year project **(First Class Grade)**: PHP based web application – tool for communication between project group peers*
- *Group project **(First Class Grade)** – As a group we developed a multi-platform photo sharing system.*

2009-2011   **HND, Computing (Level 5)**; Uxbridge College

GCSE English (B); Uxbridge College

CCNA Networking Academy - Semesters 1 & 2 (Pass); Uxbridge College

GCSE Maths A.

Received Higher Education award - presented at the **Uxbridge College awards ceremony 2011**.

Experience

2015-present   **Shopworks** - Developer

- Experience and passion for improving internal wiki documentation, which you can read about **here**.
- Involved with undertaking code review for other team members.
- Developed skills with automated deployments and DevOps with tools like Ansible.
- Comfortable with new site setup and server administration.
- Very comfortable with Git

2014-2015   **YourParkingSpace** - Developer

My first role as a professional developer, spending 9 months on this exciting product.

- Day-to-day bug fixing, and implementing new feature requests.
- Git experience improved, working in a pull request development cycle.
- Always part of technical discussions within the team for on-going improvements.
- Involved with migration to SSL site version.
- Implementation of Stripe payments API within an instant payment system.

Technical Experience

Open Source

- **Ansible role for installing PhpStorm**, which I developed to help automate the installation of new versions.

Programming Languages / Skills	**PHP:** Very confident with this language and the new features available in PHP 7.
	Markdown: Very comfortable writing with markdown. A key example of this is that my resume is written in markdown and then converted to HTML, PDF and other formats.
	Ansible: A lot of experience with this tool in terms of provisioning and using it for deployments.
	Basic knowledge of **VueJS**, **React JS**
